TAKANE BALL

981 Takane White & Black Ball

A soft, fabric ball, also called a **puzzle ball**, was made for little ones who are just starting to grab. The design of the first Montessori ball allows for a **variety of gripping** methods and enables to freely place it from hand to hand. This helps to build **wrist strength** and **hand-eye coordination**.

PHTHALATE**

885 Sensory balls box - 6 pcs.

874 Sensory balls box - 3 pcs.

Owing to the texture used, you can stimulate the child's sensory receptors in various ways. By leading the ball on the back and legs, we **relax the baby's muscles**. By giving him a ball to play with, you **develop their hand muscles and learn to control the fingers**. Gentle massaging of the whole body relaxes and calms the baby and speeds up falling asleep.

875 Sensory balls box - 5 pcs.

A bath does not always have to be a compulsion, it does not always have to be boring. To the contrary ... **the ducks** from **Mom's Care** will make the play in the bathtub or pool a special and unique moment. While **learning the shapes**, **the toddler can let in and let out water**, as well as throw water at their parents and celebrate Wet Monday not only during Easter.
